Work Experience

Date Maroon

March 2026 - Present

Internship

- Constructed UX and mobile app testing for Maroon, a values-first iOS app, focusing on onboarding flows, trust signals, and user friction analysis.
- Identifying and documenting high-impact bugs and friction points with reproducible steps, severity ratings, and actionable fix recommendations for the product team.
- Performing multi-pass testing across clean first-run, happy path, returning login, permission variations, and messy user failure scenarios to ensure defensible, reproducible findings.

Project

League of Legend Analysis

Nov - Dec, 2024

- Conducted comprehensive exploratory data analysis using Pandas and Plotly to quantify the correlation between in-game statistics and match duration
- Engineered features and optimized data transformations to enhance the predictive accuracy of Scikit-learn models
- Validated analytical findings using rigorous hypothesis and permutation testing to ensure the statistical significance of game outcomes

Health Problem Analysis

March, 2025

- Developed a responsive web visualization dashboard using HTML, CSS, and JavaScript to illustrate prevalent health trends across different age groups.
- Built an interactive user interface that processes demographic inputs (age/gender) to provide personalized disease risk assessments and health recommendations

Bird Classifier

Jun 2026 - Present

- Engineering a deep learning image classification pipeline using TensorFlow to accurately identify over 150 distinct bird species
- Optimizing model performance by leveraging feature extraction and fine-tuning pre-trained networks to maximize classification accuracy

EDUCATION

UC San Diego

Expected Graduation : June, 2027

Bachelor of Science, Data Science

- GPA: 3.64/4.0

SKILLS & INTERESTS

- **Skills:** Data Analysis, Git, Github, Java, HTML, Python, Data Management, Customer Service, Team Player
- **Interests :** Coding; Traveling; Photography; Editing
